Result	Comments
Validate (1)	

Course: Engineering and Design Technology

Result	Comments
Validate (1)	

Course: Advanced Architecture Design – 1 reviewer

Result	Comments
Validate (1)	

2. General comments regarding course outline review.

- On par with industry
- Auto: Basic auto shop
- Drafting vs Board drafting

3. Questions to Business Panel regarding careers, trends and needs in the career pathway.

- Trends in diesel engines in high school
- Solid works

a. Are potential employees prepared for your job market? If not, how can we better prepare students for entry level positions?

Students are getting the basics for the automobile industries but could benefit from modern/newer equipment.

b. Is the curriculum in your specific field addressing industry needs?

For automobile, yes, for entry level

c. What work ethics do you believe educators should be emphasizing with students?

Safety is the biggest. Attendance, also willingness to work and follow instructions.

d. What levels of core subjects, math and language arts, skills are required for an entry-level position in your organization/industry?

Basic math skills are needed, strong comprehension of the English language.

e. What is the most critical issue facing your organization and/or industry today?

Willingness to start working after clock in. Also, competent workers.

4. General suggestions and recommendations.

Possible internship locations
